Premium shower units, high efficiency stove hoods, zero emission plywood and more...

SOMANY CERAMICS

Somany's patent VC Shield technology is known for making tiles abrasion resistant and shielding them against wear-tear, stains and scratches, thus keeping their appearance fresh and new. The brand has now launched its patent VC Shield tiles with Germ Shield Technology which gives them anti-bacterial properties. While the VC Shield protects the colour, design and finish of the tile by retaining it between two unique glazed layers, the Germ Shield Technology prevents the growth of germs. It is manufactured with a special nano chemical which inhibits the growth of germs, bacteria, fungus and other microbes that come into its contact. Available in both ceramic and GVT tiles.

GRAFF INDIA

The new thermostatic units from Graff are equipped with a control button that fixes the temperature at a desired level as per the user's safety and comfort, thus preventing accidental burns. Despite other water outlets in use in the same house, the thermostat ensures uniform temperatures during a shower. These units are available in more than 20 finishes, including the ultra-resistant PVD finish, onyx PVD, OR'osa PVD, polished brass PVD and brushed brass PVD. These units are also compatible with Graff's M series which allows one to control up to seven different outlets with only three handles, and can easily be installed.

PRICE ON REQUEST

SERTA INDIA

Serta, one of the leading mattress brands in the US, has launched the Cool Solace and Cool Sense from the iComfort mattress collection in India. The mattresses feature Cool Action Gel, an advanced material infused with gel beads that respond to the body's needs for comfort, support, durability and temperature regulation. This material has an open cell structure to significantly increase the airflow and dissipate heat. It also helps in reducing the average body pressure while sleeping and reduces tossing and turning. The iComfort mattresses also feature Serta's Cool Action Gel Memory Foam for a comfortable and supportive sleep surface.

₹ 47,600 (COOL SENSE) AND ₹ 59,750 (COOL SOLACE)

FABER

Designed and crafted in Italy, Faber's Bios hood is equipped with Energy Diffuser technology that reduces noise up to 3dB (A) and guarantees 30 per cent higher efficiency even in the presence of a long air cut. The hood can remain switched on for 24 hours a day, and the Delay 30 switch allows an automatic delay in turning off the motor. It is made of special anti-fingerprint stainless steel for mark-free surfaces with a rear outlet that eliminates the need for an upper duct. Additional features include LED lights, a stainless steel filter for absorbing grease, 1,000 m³/h suction power that eliminates lingering steam and odour, and an alarm for cleaning the anti-grease and anti-odour filters.
