Faucets inspired from automobile designs, water purifiers that dispense cold water and more...

GRAFF

Graff's latest offering Harley is a collection of faucets with contemporary lines and takes inspiration from the automobiles, particularly the two-wheel world. The Harley handle gives the product its uniqueness — it's the elegant reinterpretation of the industrial and mechanical shape of the car steering wheel. Creators, G+Design Studio, worked very carefully on the details of the handle to devise a beautiful, practical and functional solution. Its ergonomic shape provides the possibility to insert the fingers inside the handle, or to operate the controls by gripping them from the outside. The handle is deliberately knurled and the surface is ridged to prevent slipping even with wet or soapy hands. The series includes versions for the washbasin, bathtub, bidet and the shower area; and are available in popular finishes including Onyx, a PVD finish which is both attractive and durable.

BLUEAIR

Joy S, the newly launched powerful air-purifier for compact living comes loaded with features to deliver clean air based on unique HEPASilent filtration technology, which combines electrostatic and mechanical filtration of particles. It removes 99.97 per cent of air borne pollutants, bacteria, virus, allergens, micro plastics, smoke, dust, pet dander and pollens as small as 0.1 micron in size. Joy S is capable of a 200-cubic meter per hour CADR and gives a whisper silent performance. The air-purifier assures clean air for 16 square metres area every 12 minutes. It is energy-efficient with just 1.5 watts of energy consumption on normal fan setting and a maximum of 10 watts on 3rd fan setting.

NOLTE INDIA

At the recently concluded Salone Del Mobile Eurocucina 2018 show in Milan, Nolte introduced the Glas Tech Plus modular kitchen. The highlights of this product includes its high-quality real-glass fronts which come in four finishes — High-gloss white, Magnolia, Sahara and Night Black. Additionally, the kitchen displays black Matrix Art handles, design-glass doors with aluminum frames in matte black, a 25mm thick worktop with a visual highlight of the backsplash in a Rusty-Steel finish, and corner solutions with electric lifting columns. Lastly, individual drawers are designed with built-in LED lights for that Gen Next elegance.
