GENYUE5+ FULL DC INVERTER VRF SYSTEM BY TRANE

The fifth generation Genyue5+ inverter is designed for better efficiency in day-to-day operations and lower energy consumption, while also improving capacity, ensuring reliability and delivering ease of operations. The advanced system provides 26% better efficiency with its compact design, saving up to 30% more space. It is an ideal choice across retail, healthcare, hospitality, commercial and educational institutions.

KOAN DOORS BY KOKAI STUDIO FOR LUALDI

Combining the brightness of precious glass and metal finishes with the warmth of wood, Koan Doors are a perfect cohesion of technology and tradition. The combination of vertical slats highlights the value of the glazed panel, offering a scenographic view of the space beyond the door. Inspired by Japanese interiors, it is a sliding door system with 50mm-thick aluminium edges, 6mm-thick tempered glass and solid wood slats with a trapezoidal section. It is available with fix and sliding panels, track with shock absorber system and trolley with height adjustment mechanism. These aesthetic doors are available in a range of finishes.

CEILING SHOWERHEADS BY GRAFF

Graff revealed the design of its latest ceiling-mounted showerheads. Developed in stainless steel, these minimalistic designs that promise long-lasting high performance are part of the company's complete shower programmed. They are available in rectangular, square and circular shapes, and include both rain and mist functions for a fulfilling spa experience. The recessed circular shower head is available with or without mist function and is provided with a full spectrum LED chromotherapy, which can be activated and regulated with the help of a remote control.
