Clean and Expressive

The kitchen and bathroom always seem to bring the biggest return on investment in interior design. The Kitchen and Bath Industry Show (KBIS) in Las Vegas (January 19–21, 2016) is a good place to see trends in functionality, including freestanding tubs, smart faucets, user-friendly technology, and customizable features from more than 500 brands. Industry-wide, manufacturers are also offering a range of aesthetic options to suit everyone's style, taste, or individual experience, whether it be an industrialized loft look—Boffi's Pipe hooks are just one example—or a more handcrafted finish, as in B&B Italia's Fulgens stool. Whatever one's needs and tastes, the products shown here will help create standout spaces in any kitchen or bathroom project. —Paul Makovsky and Avinash Rajagopal
