BEJEWELED BATHROOMS

Graff presents 'Finezza', their newest and one of the most glorious faucet collections for the bathroom. The faucet's main body has been developed in a shape that relies on a unique horizontal section that is wider at the base and at the top and slimmer in the middle. The spout recalls the design of the body, starting with a trapezoidal section, which expands slightly at the end to accommodate the water-saving aerator. The collection is available in various polished as well as matte finishes, which have a certain classical radiance to them.
