

Product Introductions

1

1 **Nora Lighting** has added to its series of Diamond II Retrofit LED recessed fixtures. The 5-inch aperture LED downlight features a 10.55-watt LED module producing 650 lumens with 90+ CRI for more realistic color rendition. An adjustable gimbal rotates 356 degrees and adjusts from 0 to 40 degrees. Suitable for wall-washing effects, accent lighting, and sloped-ceiling applications, the fixture offers a choice of three trims and a range of finishes. Nora's Unitized Thermal Management system ensures cool operation, and the downlight works with most leading-edge electronic dimmers and trailing-edge incandescent dimmers. It is cULus listed for damp locations and is Energy Star rated for more than 50,000 hours of performance. noralighting.com **Circle No. 805** on reader service card

2 The Terra collection from **Graff** features 25 items from floor-mounted tub fillers and classic lavatory faucets to towel bars and tissue holders. The collection is characterized by contemporary, bold lines and fluid, minimalist shapes. Manufactured using brass, the Terra collection is available in polished chrome, brushed nickel, polished nickel, and olive bronze finishes. graff-faucets.com **Circle No. 806**

1 DOOR or 1,000 DOORS

A Time Honored Tradition

Quality cabinet components are what we do—and we've been doing it for decades. You give us your specs. We'll make doors you'll be proud of.

LED LIGHTING 204: LED AND SOLID-STATE LIGHTING OPPORTUNITIES FOR AGING EYES, HEALTH AND BEHAVIOR

WEDNESDAY, OCTOBER 14 • 2 P.M. ET

The lighting marketplace is changing more rapidly today than any time in the last 100 years. Much of this change revolves around the innovations that are occurring with LED and solid-state lighting technologies. And the unique characteristics of these technologies are opening up opportunities for designing lighting systems that are more comfortable and more effective for aging eyes. LED and solid-state lighting also enable lighting systems that are healthier and more conducive to positive effects on human behavior. In this free one-hour session, we will discuss these technological changes and analyze applications where LED and solid-state lighting can provide more effective and more comfortable human environments.
