## GRAFF, a complete assortment of freestanding faucets, ideal to satisfy every personal need.

With GRAFF ([www.graff-faucets.com](http://www.graff-faucets.com)), the center of the bathroom, the bedroom or the "open space" are enriched with original features.

With the attention increasingly turned to the taste and the dynamics of interior design, GRAFF has developed, over the years, a large number of free-standing elements that find few rivals in the faucets industry. Solutions that give way to creativity and allow the architect to manipulate the environment freely.

In line with the evolution and changes in lifestyle, Bali, created by the young designers of the G+Design

Studio, reinterprets design trends that come from the past, in a modern way. For those who miss the traditional star-shaped handles, Canterbury offers the perfect answer.

Bali is essential, the pure form stands out thanks to the perfect combination of sensuality and rigor. A timeless collection; sinuous lines designed to satisfy any type of design: showers, freestanding elements, wall-mounted solutions. The classic faucet architecture - body-mouth-lever - is redefined in favor of a harmonious cylindrical shape, which recalls an old 1800's water pump, without compromising functionality in any way. ■
