

New on the market

ELEMENTTO WALL COVERINGS

Go bold with shimmering, metallic wall coverings from Elementto by Rohit Gupta. Their new collection of washable wall coverings is distinct from traditional, soft textured designs with its embossed metallic prints and shimmering geometric designs. Made of foil, these wall coverings instantly transform any space and aid renovation projects. The collection includes old-school patterned wallpaper designs with a contemporary twist and even minimalist stripe and zig-zag patterns in shades of gold and silver. With a wide variety to suit all preferences, Elementto's wall coverings are suitable for projects that need an instant facelift.

SENTO FAUCETS BY GRAFF

Sinuuous lines and refined aesthetics underline the built of Sento, a collection of faucets by Graff, designed by the Italian studio Angeletti Ruzza Design. The faucets and shower systems are designed to maximise water conservation. Despite the company's use of metal finishing and modernised plating, Graff has a zero discharge system that recycles 100 per cent of its brass and paper products. With each product being engineered, manufactured and inspected in-house, these fixtures deliver the highest level of quality.

NAVI BY STEELCASE

Volatile market conditions and the fluctuating work culture are pushing companies to adopt agility in their strategy. Addressing this critical need, Steelcase conducted research projects across the country to understand the work behaviour in India. Based on their extensive research and study, Steelcase uncovered a workplace solution to unleash the workers' potential and boost productivity and wellbeing at work by launching Navi Teamsland. It has been thoughtfully designed to unlock the traditional stereotype of Indian workplaces, thereby, enhancing flexibility and fostering physical, cognitive and emotional wellbeing.
