

# The Right Tub

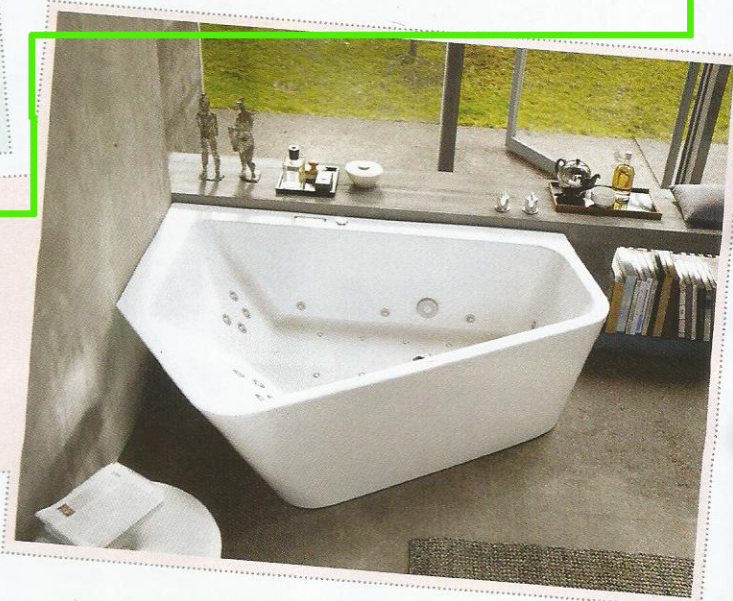

If you are looking to add a new bathtub to your bathroom, find out the option that suits you best

**IMPRESSIONS: RUHI SINGH**

## **WOODY MAGIC**

Dressage from Graff is harmony, geometry and versatility. The tub is made from a sheet of DuPont Corian thermoformed and coupled with solid wood. The transverse cut on its entire section adds to the design element and the high area of the tub is perfect to stretch and relax. The free-standing tub comes with a head rest and a shelf for storing beauty products.

## **COMFORT FIRST**

Focused solely on individual comfort, Paiova 5 bathtub from Duravit offers the choice between an ergonomic sitting position and an especially flat reclining position. A perfect symbiosis between a corner and a free-standing bathtub, Paiova 5's meticulous details ensure extraordinary comfort. Each version is available in two sizes – made entirely of acrylic: a sculpture extending into the room, and as a built-in version for customised installation.

## **GLASS BODY**

The combination of aesthetic and functional values can be seen in the Water Lounge Concept from Hoesch Design. Enjoy the fascinating wellness experience wherein you can lie down comfortably in a transparent glass cube and let the light, water and delicate air massage and regenerate your body and soul. Available at Etre Luxe.
