Designed by reputed product designer Antonio Cristofaro, the QUEO's collection is available under two series - F-Mosaico and F-Mosaico Oro. Created with hand crafted mosaic from Bisazza, Italy, the series in Black and Gold is presented under F-Mosaico while the F-Mosaico Oro series highlights muted shades, blue, green and gray mosaic cut to perfection and delicately placed to provide the faucet a non-disruptive, yet distinctly opulent look.

Escuadra Pure faucets by Roca brings together square shapes with exclusive crystal handles providing a smooth and luxurious experience to the user. The square shaped faucets with distinctive cut glass handles appeals to the aesthetic need for homes and public spaces. They not only offer elegance, but also guarantee long-lasting brightness.

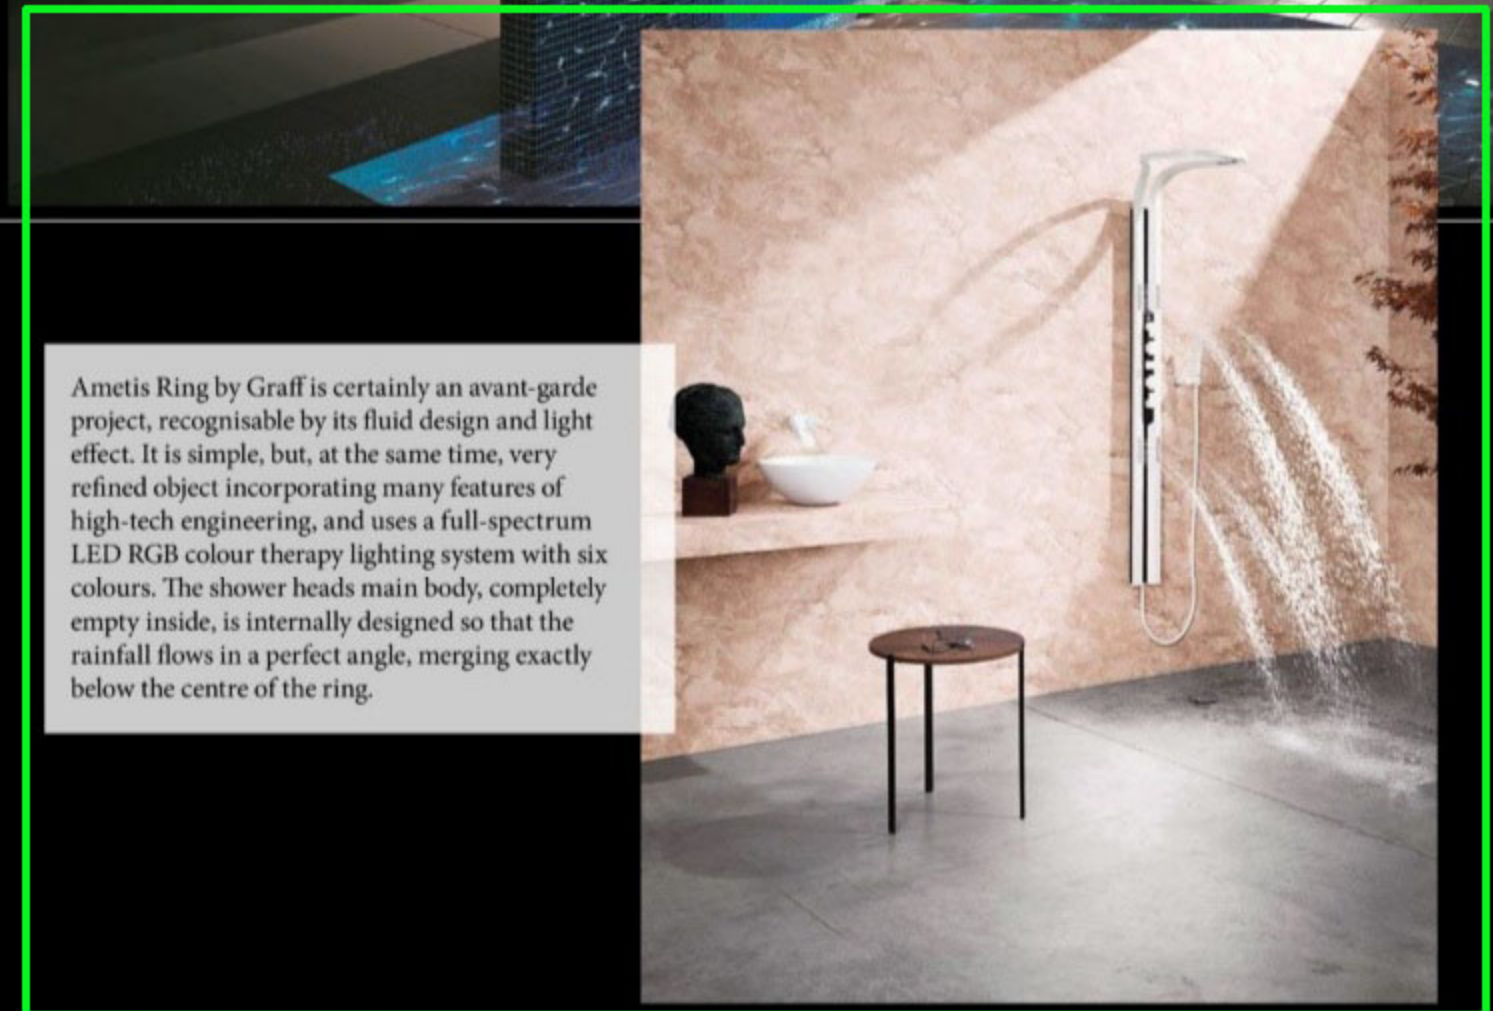

Winner of the prestigious Interior Design Best of Year Awards in the Bath section, Graff LUNA's singular design is supreme not only for its distinctive shape, but also for the mirror-like finish, which gives its surface a highly reflective effect. Equipped with an aerator, the LUNA faucet has a flow rate of five litres per minute with a three bar pressure. Available with wall-mounted or deck-mounted handles as a lavatory faucet, the collection also includes an original shower column recalling the curve of the spout.

Intuitive and intelligent in the way it works, the sleek three flow Rain Spa shower from Hindware Italian collection is a gentle fusion of light and water. The seven coloured LED shower with three different water flow options;

voluminous rainfall, massage column and gentle mist spray, easily controlled and operated by a diverter gives you the choice to choose water flow options and colour depending on your mood and bodily need.

Ametis Ring by Graff is certainly an avant-garde project, recognisable by its fluid design and light effect. It is simple, but, at the same time, very refined object incorporating many features of high-tech engineering, and uses a full-spectrum LED RGB colour therapy lighting system with six colours. The shower heads main body, completely empty inside, is internally designed so that the rainfall flows in a perfect angle, merging exactly below the centre of the ring.
