GRAFF'S LATEST INNOVATION! THE TEPHI BATHTUB, WINS THE PRESTIGIOUS #METROPOLISLIKES AWARD, 2017

Tephi, GRAFF's Sleek-Stone® bathtub, has been honored for its contemporary design and artistic quality as a 2017 #MetropolisLikes product. The awards program celebrates the best in design at the annual NYCxDESIGN festival in New York, inclusive of products showcased at International Contemporary Furniture Fair (ICFF). The innovation, defined by GRAFF's new Sleek-Stone® bath program, emphasizes the brand's artistic and creative sensibility, and underscores GRAFF's commitment to the creation of innovative bathroom systems.

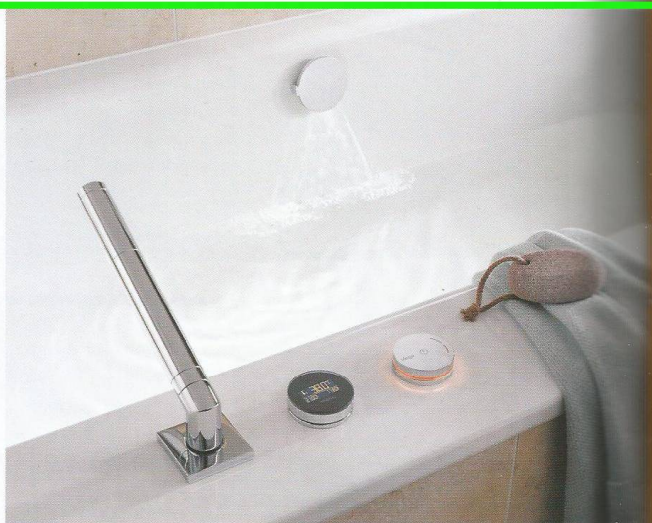

A kaleidoscope trophy, designed to symbolize the ever-changing world of design, was presented to GRAFF President and CEO, Ziggy Kulig, in celebration of the accolade. In reaction, Kulig commented: *"This recognition confirms GRAFF's constant dedication to go beyond the boundaries of bathroom design and to challenge the existing architecture paradigms."* ■

NOISELESS BATHTUB FILLING AT THE PUSH OF A BUTTON

Enjoy automatic bath filling with the Viega Multiplex Trio E that controls the temperature and water level, allowing you to take a bath under the perfect setting. This complex, yet easy to use automatic controller fills your bathtub with the push of a button. Viega has expanded its successful product family of electronically regulated bathtub fittings. The two versions of the Multiplex Trio E combine intuitive operating comfort with excellent design making them suitable for hotels and high-end residences.

Ecological quality: A special highlight of the Multiplex Trio E3 is the so-called statistic function. For example, how much water has been consumed within a particular time period. In addition, the personalized settings stored in the memory ensure individual preferences and can be retrieved whenever required. ■
