

### Opulent faucets, tub fillers, shower components

**GRAFF** introduces a range of faucets, tub fillers and shower components as part of its opulent MOD+ Collection that pairs marble and brass in distinct designs. Handle covers—equipped with brass bases and knurled detailing—in three variations of pure marble originating from Italy’s Tuscany region can be mixed and matched with 17 brass finishes. A clip on each handle side creates movement and additional opportunity for customization. Including 34 products, the collection presents a lavatory faucet in single-hole, widespread, two-hole and wall-mounted applications.

### Instant filtered hot water

The **INSINKERATOR** Digital Instant Hot Water Tank dispenses near-boiling filtered hot water for hot beverages, cooking, cleaning without chemicals and countless other kitchen uses. Its advanced design features a 100 percent all-welded tank that eliminates the need for seals and o-rings, while being compact enough to hang neatly on a back wall or freestanding under a sink. A digital touch-screen thermostat allows users set the ideal water temperature—between 190 F and 210 F. Find the instant hot water tank through wholesale distributors.

### App, desktop payment processing platform

Securely take payments in the field on any mobile device using **TOTALHOUSEHOLD PRO**’s app. Specifically designed for the construction industry, the app can take payments via checks and credit cards, partnering with CardConnect to provide a seamless and secure merchant services platform. Funds can be received in as little as one to three days. Additionally, the app can provide invoicing, create recurring payment schedules, digital or printable receipt options and more. The payment processing platform suggests it has a straightforward, affordable rate plan.

### Alternative infills for railings

**FEENEY** expands the range of solutions for its DesignRail Aluminum Railing line with DesignRail Panel Infills in a variety of materials, options and styles. Stainless Steel Mesh Panels come in four design styles, while the Resin Panels (for indoor use only) and Laser Cut Aluminum Panels each come in nine standard styles with additional design options available. The Stainless Steel Mesh Panels are compatible with all of its DesignRail top rail styles. All decorative infill options can be mixed and matched with other infill options.
