

WATER CHANDELIER

The Melograno showerhead designed by Davide Vercelli for Fima Carlo Frattini and Italian interior lighting manufacturer Melograno, is shower-cum-chandelier. Each showerhead consists of ten blown glass spheres in satin and metallic finishes that are suspended at different heights through silicon tubes. The glass balls are covered with steel mesh making it look like a drop of water. fimacl.com

WALL-STRUCK

Cover wardrobe, designed by Giuseppe Bavuso for Rimadesio is now equipped with new finishes and structural components. The ceiling to floor fixed walk-in wardrobes are integrated with internal LED lighting system and have niches with no threshold on the floor. Available at Vivano Designs. vivano-designs.com

[NOVEL SHADES]

Graff has introduced two new cutting-edge finishes Brushed Onyx and Brushed Or'osa in its existing product portfolio. The new range is well-obtained through a PVD (Physical Vapor Deposition) that creates a high level of tough surface with resistance to atmospheric agents and house detergents.
