RADIANT FINISH

Orient Bell Limited has launched a super glass tiles. These tiles are manufactured with a special glaze and are polished to develop a gloss of more than 95 per cent to keep your home looking spectacular. This is also the most advanced technology available in the industry that amalgamates a perfect blend of strength and appeal. These tiles are ideal for use in smaller rooms, as their beautiful finish will bounce light around the room, making it appear airier than it actually is. Their slippery nature also makes them ideal for use on bathroom walls, or as kitchen splash backs, as they are wipe-clean friendly; this does, of course, mean that they're not suitable, as floor tiles in high-traffic areas.

SLEEK DESIGN

GRAFF launches the innovative TERRA collection that offers modern cutting-edge solutions in cylindrical, smooth and bright shapes. Designed by GRAFF Design Studio, TERRA is a collection with several pieces and accessories. The series is available in several finishes: polished chrome, brushed nickel, matte black and matte white.

GRAFF adopts a zero discharge system that recycles 100 per cent of brass and paper. In line with its strong commitment to environmental sustainability, the Terra collection is one of the most sustainable by the American company. The collection is manufactured in solid brass with a minimum level of nickel and lead and a five year warranty.
