FAUCETS BLENDING VICTORIAN & EDWARDIAN SENSIBILITIES

GRAFF has brought to India its Camden collection of faucets and accessories which are themed on the imperious shapes of chess figures. The fittings are not made from forged brass bar, rather a solid brass

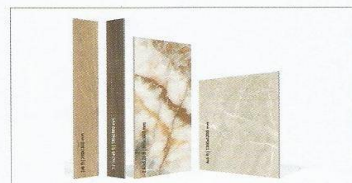

block, internally emptied. The spout of the faucet is more full-bodied and gives the whole element a unique importance and proportion. The fittings are produced in brass with very low nickel and lead content, guaranteeing long service life.

MEGA-SIZED VITRIFIED SLABS

KAJARIA Eternity has launched Ultima slabs and planks, a collection of digitally printed extra vitrified tiles. Slabs are offered in sizes 1000x2000mm (3.25x6.5

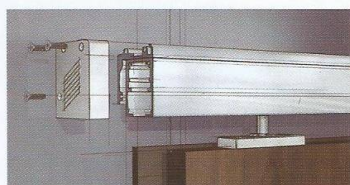

ft), 1200x1800mm, 800x1600mm, and 1200x1200mm; while planks come in 290x1800mm and 195x1800mm sizes. These technical body tiles offer real-life looks of marble, stone, wood and metal. They are 11mm thick and are suited for wall and floor application.

HEAVY DUTY SLIDING SYSTEM

HETTICH'S new sliding door system TopLine Grant is available in SD/HD/

XHD versions. The fitting is suitable for door panels 25mm thick and 3000mm in height. SD is suitable for doors weighing 68kg; HD for 147kg; and XHD for 227kg. All three versions adhere to ANSI/BHMA and DIN EN standards. They have been subjected to endurance test of 100,000 cycles, in addition to Opening Force Test, Horizontal Impact Test, and Stop Test.
