24K GOLD BATH COLLECTION SUITS LUXURY PENTHOUSE IN LONDON

London design firm Alex Gardner Interiors chose GRAFF's Sento bath collection for the penthouse at Towerbridge, part of the reconstructed luxury flats in the historic Anchor Brewhouse building, which lies along the Thames in the Tower Bridge Conservation Area in Butler's Wharf. The Sento faucets, coated in 24K gold, complement the chrome, copper, and gold of the apartment.

NEW PIVOT DOOR CAN REACH UP TO 10 FEET IN HEIGHT

Sierra Pacific Windows has introduced a contemporary pivot door, whose weight is carried on top and bottom instead of being side-loaded. Available in sizes from 6 feet wide to 10 feet high in combinations up to 50 sf. Designers can choose a variety of glass options—tinted, mirrored, beveled, frosted, obscure, and opaque. Trim, stain, paints, colors, and finishes can be customized.

FLASHING SYSTEM CREATES AIR/WATER BARRIER FOR WINDOW DETAILING

To achieve a continuous air and water barrier for the window detailing at Houston's 301-unit Inkwell at Greenhouse Apartments, general contractor TX Morrow turned to a combination of ZIP System flashing tapes. Huber Engineered Woods provided on-site demonstration to the builder's framing crews to show how six-inch acrylic adhesive ZIP System flashing tape could be used in the window pans, and how a square of 10-inch ZIP System stretch tape could be used to flash the corners of window sills over the pan flashing. After the windows were installed the team repeated a similar detail outside of the windows at the window head flashing, using straight ZIP System tape over the header and ZIP System stretch tape at the corners.
