Linear drain installation solution

NOBLE COMPANY introduces the ProBase II Single-Slope Shower Base as a complete solution for a linear drain installation. Its two-piece base construction with a low profile allows for ADA configurations, and the base can be cut to accommodate various shower installations. The shower base installs quickly with modified thin-set for a code-required slope to drain in conjunction with the company's Freestyle Linear Drain. Two configurations are available: the 32x60 Tub Replacement Kit and the 64x64 Base Kit with Accessory Kit.

Pair vessel sink with wall-mount, vessel faucet

GRAFF asserts elegance with its Armina Vessel Sink and its softly polished frame plus generous basin. Available in gloss and matte white finishes, the countertop sink is constructed from Sleek-Stone. Because the sink does not have a faucet hole, it requires a wall-mount or vessel faucet, such as the Luna Sink Filler (shown). Seemingly floating along a wall, the Luna spout delivers a flow rate of less than 1.2 gpm max, features a mirror-like finish, and offers the option of single-control or deck-mounted handles.

Drop-in airbath with waterfall system

The Aqua Moment Drop-In Airbath with Waterfall from **DXV**, part of **LIXIL**, draws on the company's Japanese heritage to deliver the tranquility of Japanese hot springs to residential bathrooms. Its Aqua Moment waterfall system provides the sensation of being fully submerged in water without needing an oversized tub, and a chromotherapy system adds a cycle of eight colors of light. Along with a drop-in design, the tub's zero-edge profile provides a minimalist design and suits bathrooms of all sizes.

Bath suite exemplifies soft modern trend

MOEN takes inspiration from the emerging soft modern design trend and nods to Scandinavian design, organic forms and soft curves with

its Doux Bathroom Suite. The faucet's D-shaped spout presents water in a flat, thin ribbon that continues the clean lines of the faucet's smooth, wide form. Available in chrome, brushed nickel and matte black finishes, the suite includes a single-handle and two-handle widespread lavatory faucet; tub-filler faucet; Posi-Temp and Moentrol tub/shower, shower-only and valve-only shower trims; ExactTemp valve-only shower trim; and matching accessories.

Smaller footprint for clamping floor drain

INFINITY DRAIN problem solves for linear drain systems against a shower wall with its Compact Clamping Floor Drain. Eliminating the need for flooring material between the drain and wall tile, the redesigned clamping floor drain measures 3 1/4-in.

diameter at its narrowest part for easier installation against the shower wall. The compact floor drain is available in three materials: cast iron, PVC and ABS. It has been recognized as the 2018 Bath Accessory Product of the Year by the Decorative Plumbing & Hardware Association.
